Crystal Blade (Beta)

INFORME DEL JUEGO: PARTE I

Tipo de juego: Indie RPG

Descargas: +5k

Año: 2018

Versión: 1.2.18

Temática: mecánicas de beat'em up (yo vs. el barrio) contexto medieval, mezclando mecánicas de inventario y progresión típico de los RPG.

Dificultad: La curva de dificultad asciende demasiado rápido, empieza muy fácil y el primer Boss es muy difícil.

INFORME DEL JUEGO: PARTE II

- **Gráficos:** el diseño de personajes y escenarios es bastante animado, estilo cartoon, aniñado.
- **Interfaz:** Es bastante simple, hay un botón para direccionarse, un botón de ataque, 2 magias, y uno de salto. Los menús son pocos y bien organizados y fáciles de usar.
- **Conectividad:** Se puede jugar sin conexión.
- **Almacenamiento:** 68 MB de descarga / 157 MB instalado
- **Plataformas disponibles:** Android 4.1 o superior
- **Tipo de juego:** Indie RPG - **Temática:** Medieval, magias, etc.

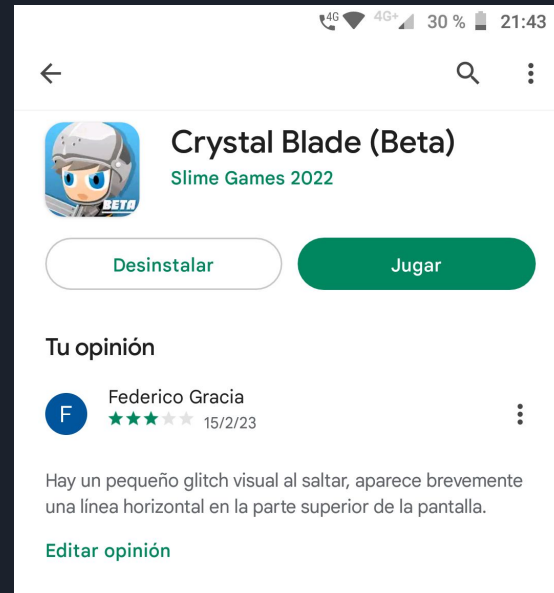

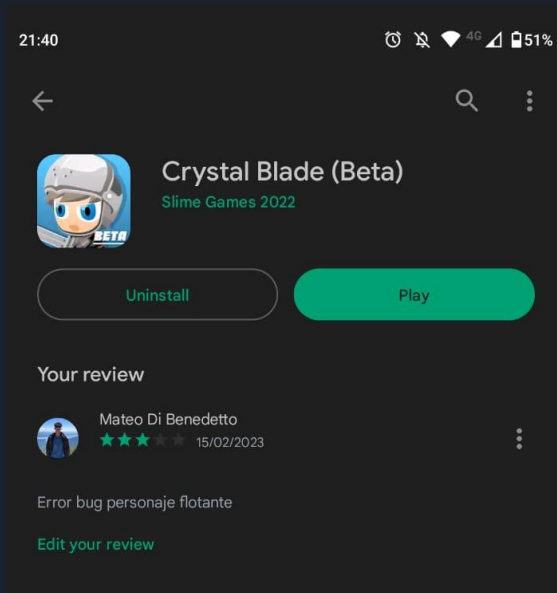

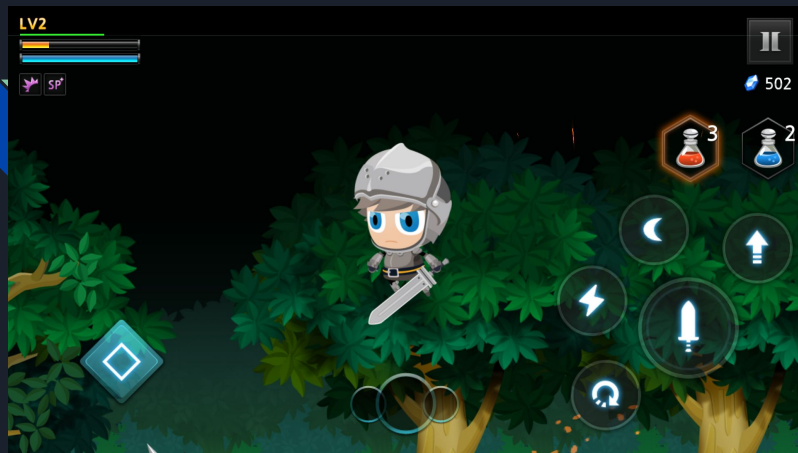

Problemas con la animación	En algunas cinemáticas puede congelarse el personaje si se activa la escena cuando justo estabas saltando o similar.
Mejoras	Los upgrades del equipamiento son demasiado caros. Se podría amenizar la curva de dificultad para que sea más progresiva.
Experiencia de Usuario	En principio es bastante accesible aprender a utilizarlo, pero al llegar al primer Boss en adelante la curva de dificultad pega un salto demasiado grande. Botones y menús simples e intuitivos.
Estabilidad / Velocidad	Es un juego offline, la velocidad o estabilidad de conexión a internet no lo hace variar.
Problemas mecánicos	El cursor a veces no responde bien (input lag).
Congelación	Notamos muy pocas veces que el juego se congela menos de un segundo, pero sucede muy cada tanto.
Bloqueos de progresión	No es necesariamente un bloqueante, pero es muy dificultoso poder mejorar tu equipamiento (necesitás muchas “gemas”, la moneda del juego).
Uso de Recursos	Notamos un rápido recalentamiento de nuestros dispositivos, seguramente sea exigente con el hardware.

Controls are horrible even though they are only 2 directions. The jump is bad as well imho. You are always lost in combat with many of the abilities. Bosses should not be this hard lol. Keep making improvements and maybe I'll try again someday.

Pretty good. But there is a lack of information. It doesn't teach us about the dodge button or the jump button. You should add more info in the tutorial. Another thing is that the jump is way too high. There is also no reward for leveling up. It should increase our stats or something or you can make a skill point system so that every time we level up we get points and we can use it to increase our attack, health, speed and other things But I understand its a new game so good luck! I love it!
